QUEST ATLANTIS

Learning through creative gaming

Dr Bronwyn Stuckey
Quest Atlantis Site

http://www.QuestAtlantis.org

More than 44,000 children on six continents have participated in the project, submitting over 50,000 Quests and completing over 88,000 Missions, some of which were assigned by teachers and others chosen by students to complete in their free time. We are in 22 states, 18 countries, 983 classrooms, and the number of schools asking to participate grows daily. Thirty-eight hundred teachers around the globe are using Quest Atlantis with their students.

We have also supported students and teachers in conducting rich inquiry-based explorations through which students learn standards-based content, and develop pro-social attitudes regarding significant environmental and social issues. Rather than just placing work and play side-by-side, QA strives to make learning fun and to show kids they can make a difference.

Social Commitments
Transformational Play

... an experiential state that involves:

(a) projection into the role of a character who,
(b) is recruited (invitation) into a partly fantastical problematic context,
(c) must apply conceptual understandings,
(d) to transform the context,
(e) and, ultimately, oneself.
Ingolstadt: Persuasive writing
Taiga: Water quality science
